

Kaleidescape - Premiere - End of Sale

With the recent news of Kaleidescape discontinuing their PREMIERE range this summer you may be looking to embrace the Strato system or making sure your Premiere system still has a few more years in it! We have listed below a few options available to you followed by a short FAQ

Upgrade your existing 1U or 3U server

LIMITED PRODUCTS!! Kaleidescape will be accepting orders on new Premiere line components up to **July 30th** this year.

Upgrading to the Strato system

Perhaps now is the time to retire your Premiere and embrace the all digital Strato system. You then will be able to buy your films from the Marine Movie Store and they will be delivered right on your yacht.

and...there is another solution available.....

Adding a Strato System to your Premiere using Co-Star

There is a third, best-of-both-worlds, solution available for Kaleidescape users and that is to use Co-Star. This is a great little combination of hardware and software that literally combines your Premiere and Strato libraries into a single entity.

Using the 4K on-screen interface of the Strato you can browse and search a single movie library in glorious 4K Ultra HD at 60 frames per second. Should you select a movie that resides on the Premiere system, the Co-Star switch will intelligently switch you over to the Premiere Player and begin playback of

the movie. When you go back to your collections screen you have been intelligently switched back again to the Strato player.

Why is Kaleidescape discontinuing Premiere products?

Reduced consumer demand and challenges in sourcing parts have made it impractical to continue to offer components for Kaleidescape Premiere systems. Declining sales of DVD and Blu-ray discs have led to decreased interest in products that play movies in these formats. It has also become very difficult to procure certain parts necessary to manufacture products that play DVDs and Blu-ray discs.

Will Kaleidescape continue to offer support for Premiere products?

Yes. Kaleidescape will continue to offer technical support, hardware repair, and software releases, as necessary.

Will Kaleidescape continue to offer movie disc recognition for Premiere systems?

Yes. Kaleidescape will continue to support disc recognition for Premiere systems for DVDs and Blu-ray Discs.

Will Kaleidescape continue to offer music CD recognition for Premiere systems?

Kaleidescape will continue to support disc recognition for music CDs. However, recognition will not be provided for newly released music CDs after June 30, 2020.

Will Co-Star continue to be offered beyond July 31, 2020?

Yes. Co-Star enables a Strato system to be combined with a Premiere system so that a customer can access all of their movies using a single user interface. Both the Kaleidescape Co-Star HDMI kit, and the Kaleidescape Co-Star Software License for Crestron NVX and Lumagen Radiance Pro, will continue to be available.

Will Kaleidescape continue to provide hardware repair and replacement support for Premiere systems?

Yes. Repair and replacement support for in-warranty Premiere products will continue as before, and we will continue to make business-reasonable efforts to support out-of-warranty products, depending on parts availability. Repair and replacement costs will apply.

Will Kaleidescape continue to offer Disk Cartridges for Premiere systems?

Yes. Kaleidescape will continue to offer 6TB Disk Cartridges for the 3U, 1U, and 1U+ servers. 10TB Disk Cartridges will also be available for 1U+ servers.
